In another column will be found the yearly statement of the Japanese Minister of Fi nance. To those who have watched the extraordinary progress of Japan during the last few years, and who have marked the and beach the vessel, for which purpose assistdifficulties with which the MIRADO'S Government has had to contend, this document will prove interesting as revealing the financial; mitting an assault, eausing grievous bodily harm, position of the country. The duties and neither few nor light. The great reduction in the taxes imposed upon the agriculturists until Saturday. and the road justment of the incomes of the nobleshad to be provided for, while later on the of the Yacht Club that a race will be sailed to expenditure caused by the Satsuma insurrection proved another strain upon the resources of the revenue. It is not at all wonderful that a deficit has to be recorded, and considering tulation that it is not a much larger amount. Several sources of income show a decrease in the receipts, but, on the other hand, it is satisfactory to note that the Customs duties China Squatron at present in Hongking Harhave produced more than in previous years, which is an evidence of a growing trade, accompanied with the field-pieces of Mer Mawhile the income from post offices, railways, jesty's ship Audacious and the band, to Happy and tolegraphs—those new Western introv ductions has largely increased. As another line, marching to the front and rear; they there indication of the progressive and enterprising spirit of the people of the land of the Rising Sun we note the fact, mentioned in formed column rear of number one; deployed to the report, that fees for passports have been greatly augmented by the number of people ground by fours again, and wheeled to the going to the Centennial Exhibition as well right; the rear then formed companies and as by those travelling on business. The national debt is increased by about, two went to enginer part of the ground where they hundred millions of yea; but, as our Tokio were drilled by an instructor. They left the contemporary points out, most of this is in the Naval Yard, and proceeded to their respective liquidation of obligations which would other ships. As one of the the straws which signify the direction of the wind, some remarks of Mr Korscu, Commissioner of Customs at Kin king in his report on the trade of that port for 1876, show once more how trade is gradually slipping from foreigners, into the hards of the natives. He says - "The only American firm in the place is about to close its business on the transfer of the Shanghai Steam Navigation Company to the China Merchants' Steam Navigation Company, so that the resident foreign mercantile firms are thus reduced to two British and one Russian The trade of the port is conducted by about thirty Chinese firms, of which thirteen are ten hongs, seven dealers in opuin, five shipping agents, four piece goods dealers, one sugar merchant, and the Chinese River day afternoon. In all parts of China this is more or less the case; the foreign swrchante have, I in fact, taught the native how to do without their assistance. There was, in old times, too much left to the compradores; while the profits of foreign merchants were reduced by the competition into which they entered. The Obinese merchants have now fairly entered the field, and have to be reckoned with and was somewhat surprised to learn that she place on the E. countries 14.25 and 14.50 guilders to rowed 15.000,000 year of these bonds, upon They cannot, however, do without the foreign intended to take no action whatever. INTRODUCTION TO THE TABULATED ESTIMATES OF INCOME AND EXPENDITURES The tables of the expenditures and income for the tenth your of Morni, according to the enstern

23th December, 19th Year of Marit

of previous years, are founded apour the estimates received from the heads of the various departments and these important returns consist of the items becoultor given The entire revenue for the fiscal year is somewhat above 51,256,400 yen, and, if compared with

that of the former year, shows a decrease of upwards of 11,730,200 yes. This decrease is due to the following causes :--The decree for the reduction of land taxes and for the delay in collecting the same, and the default in taxes in the vicinity and on account of

the late rebellion. Secondly, in the income tax the e has been an increase in the receipts from Imperial commissions, but the receipts from taxes upon government commissions have decreased. on account of diminution both in the number of the government servants and in the amount of saleries. Again, the decree for the exchange of pensions of the nobility and gentry for government bonds has caused a great reduction in the taxes from that source. - Besides this, the stamp duties upon silk, cocoone, floss silk, and the license fees from silk merchants, have all been abolished Also, the former year's estimate of taxes upon tobacco was greatly in excess of the taxes actu-Ipoune derived from Toleally collected; therefore I have this year reduced the estimate on this item accordingly. In addi- on Manufactures tion to this various stamp duties and license foes, for lawyers, partnerships, the manufacture of weights and measures and the sale of medicines, like the tax on tobacco, had been over caloulated before, and have been reduced in this year's statement. The items of receipts from mines and government manufactures have been computed by the actual receipts of the previous year. In the navy yards the decrease in the expenditures is owing to the cessation of work in the Kagoshima yard. In the sales of government property, while the items have been greatly increased in number over the provious year, the

The diminutions in the several foregoing itoms of revenue amount collectively to 12,092,326 yen. While the revenues have, as above stated, fallen; off-during the year, there are three or four items

in which they have been increased; the most important of which I give as follows, viz The Customs duties have greatly exceeded the round, and saw the prisoner with the hat in his amount collected from that source in the previous year. Next, the products of the northern provinces have commanded superior price in the market. Then the receipts from the Riu Kiu Han have been augmented by the advanced cost of rice. The estimate of returns from taxes upon sche, etc. has been reskoned upon the actual in. come of the provious year, taken in conjunction with the prospects of the current year. Also, the income from the post offices, milways, and telegraphs has greatly increased from the fact of the facilities for traffic having come more and more into favour among the people. Finally, the fees for passports giving permission to travel abroad have been largoly augmented by the number of reople going to the Centennial Exhibition ne wall as by those traveling on other business.

The total increase of revenue from all the foregoing items amounts to 353.122 year, which, if subtracted from the former aggregate deficiency. shows the true decrease to be 11,739,204 yen. The entire expenditure of the present year is ... My Shot estimated at 51.256,400 yen. THE GERMAN NAVY

The Times observes that few movements are years been diveloping Germany into a usval Power. As a matter of deliberate intention, the idea of such a development dates from the Danish war and the acquisition of the important harbour of Kiel. Nothing could be better than the method the Germana seem to have pursued in davising their plan. Their purpose was first, to defend their own shores, and, secondly, to protect German commistee and German colonists abroad. But the point in which we may with most advantage take a lesson from the German proceedings is not in the partioular class of ships they are building but in the care they have taken to discover what class is required for the varied necessities of their coast service. We cannot Be soo feel any confidence that a similarly prudent plan has been pursued among ourselves. CAPTAIN

Advices from Achien some down to the 24th December. No warlike operations of any importance had taken place at Great Achem from November 1st to that date, what hostilities there were being confined to the depredations of marant ders within the Dutch lines and their pursuit by patrols. The campongs in the occupied territory around Kotte Rajah were becoming more and more inhabited; many Achinese had submitted to the Dutch and had settled down. On the 6th and 18th Docember, 74 Chinese immigrants from Penang arrived at Kotto Hajah In the interior | THE Undersigned is prepared to Grant cattle ware dying of discose in great numbers. upwards of 12,000 caronses baving been brought down by the Acheen river. On the East coast the cattle disease have been committing great ravages to the great grief of the agricultural population who cannot do without eattle to plough their paidy fields and convey their pepper At Pedir a storekesper named Laufstein had been murdered by Pedirosa. The Assistant MANCHESTER FIRE ASSURANCE COM. Resident there has been instructed to domand the delivery of the criminals. The said official had visited several of the patty States on the coast in most of which he was very well received; from a few of them hostile feelings had however not yet departed. In Samalagan, the well disposed portion of the population kept quiet but kow, and are prepared to grant Insurances at the distiffected continued to murder and make Current Rates. murderous attacks. Recently they treacherously attacked several African soldlers, who, however firmly stood their ground and made the assellants pay dearly for their fast - Straite Times.

A NEW PRIMA DONNA

One of the nevelties in the way of prime donne whom Mr. Gye designs to bring out at Covent Garden in his opera campaign next spring has, usys the Whitehall Review, created quite a furore in Malta, where she made her debut on Nov. 21. This young lady, it seems, hails from New Orleans, and prior to her arrival in Malta had been studying under Bidlie Albani, who as most of us are aware, was berief first marked out for future fame at the Valletta Opera House Mille. Emma Sarda, the name of the debutante in question, is at this present moment being raved about by every British officer in the island and even those monuments of critical arrogance, the Maltess, caunot refrain from crying out brava, bravissima ! at her woudous powers. Her toice, manner, and charming personal looks all combine by their united excellence in gaining the applause of the critics. Midle. Sards is excessively youthful in appear ance. She exhibits none of that raimpant verse with which American actresses ure so frequently endowed, but note with an earnest child-like selfpossession which is in its way quite touching to witness. There is in her mamer nothing of the fottered dove on the one hand, nor the skittish hoyden on the other; her whole soul seems thrown into whatever she says and does in the most intensely realistic and yet in the most un-obstructive style. Moreover, she has the talent, and what is rarer still, the courage to express in her face and action exactly what she does feel and what the incidents of the opera intend her to feel throughout. Her voice is of equal quality with her artistic acting; and on the whole Mr. Gye may be promounced in lack again. The young lady is understood to have leased her voice and talents to the latter gentleman for six years. consequently, unlike Albani, she will not stand in need of a second Colonel Macroe to back her up.

The other day the Right Rev. Monsigner Fisher was eramining a class of boys in the Catholic catechism, at the Holy Cross Schools, Pontency Street. He put the question- How did the Lord punish Adam for his disobedience: in the Garden of Eden ?-" A smart urchin replied; Please, sir, he turned him out of the garden, took a rib from his bedy, and with it made a wife for him."-Liverpool Post. A new Congregational Church has been opened at Upper-street, Islington. Inplan and arrangement it is somewhat of a novelty, belonging to the class which includes Santa Fesca, Torcello, St. Stephen's, Walbrook, and other churches, based, not on the ordinary principle of a nave and purpose of this arrangement is to bring all the tributed among all Contributors of Business in congregation numbering 1,600 or more well proportion to the premium paid by them: within range of the preacher's voice, and to place them where the stone piers will not intercop their view of the pulpit - The galleries, unlike those which it was the fashion a hundred years age to thrust into many old and all new churches, are not mere wooden stages. As at Andernach and Flavigny in Western Europe, and in many Bysantine structures, they form an essentia perb of the general design. They are carried on retone arcades, and have stone parapets inlaid with marble and onyk. A large tower, of which the first sixty feet only are built as yet forms apous into the charele by a lofty arole, and soutains nearly 300 sittings. Bolind the church | HE Undersigned having been appointed are schools for 700 children, a lecture hall, and architect is Mr. James Cubitt.
